The Board was established in 1997 by the Virginia General Assembly using funds provided from the conversion of Trigon from a mutual company to a stock company. The Board awards grants for traditional medical and biomedical research as well as research related to health services and the delivery of health care. Since its inception in 1999 the CHRB has funded 202 research grants totaling almost \$16.5 million. CHRB grant recipients have leveraged approximately \$32 million in additional private and federal grant funds to further their research studies. Additionally, numerous publications in peer-reviewed scientific journals and periodicals as well as presentations of the data at regional and national scientific meetings have resulted from CHRB grant funded research projects.
